## *Lab Programs*

### **SET 13- Geographic Data**

#### **13A. Map Chart**

##### **Program:**

```
install.packages("ggplot2")
install.packages("plotly")
install.packages("knitr")

library(ggplot2)
library(plotly)
library(knitr)

geo_data <- data.frame(
  City=c("City A","City B","City C"),
  Population=c(500000,700000,600000),
  AvgTemperature=c(75,68,80),
  Elevation=c(1000,800,1200),
  Longitude=c(78.5,77.2,79.1),
  Latitude=c(17.4,13.0,15.5))

plot_ly(
  geo_data,
  type="scattergeo",
  lon=~Longitude,
  lat=~Latitude,
  text=~City,
  mode="markers"
) %>%
layout(
  title="Geographic Distribution of Cities",
```

```
geo=list(showland=TRUE))
```

**Output:**

### 13B. Scatter Plot

**Program:**

```
ggplot(geo_data,  
aes(x=AvgTemperature,  
y=Population))+  
geom_point(size=4,color="blue")+  
geom_smooth(method="lm",se=FALSE,color="red")+  
labs(title="Average Temperature vs Population",  
x="Average Temperature (°F)",  
y="Population")+  
theme_minimal()
```

**Output:**

### 13C. Table

#### Program:

```
kable(  
  geo_data,  
  caption="Geographic Data of Cities"  
)
```

#### Output:

| Table: Geographic Data of Cities |            |                |           |           |          |
|----------------------------------|------------|----------------|-----------|-----------|----------|
| City                             | Population | AvgTemperature | Elevation | Longitude | Latitude |
| City A                           | 5e+05      | 75             | 1000      | 78.5      | 17.4     |
| City B                           | 7e+05      | 68             | 800       | 77.2      | 13.0     |
| City C                           | 6e+05      | 80             | 1200      | 79.1      | 15.5     |

### 13D. Interactive Dashboard

#### Program:

```
htmlwidgets::saveWidget(  
  dashboard,  
  "GeographicDashboard.html",  
  selfcontained=TRUE)  
browseURL("GeographicDashboard.html")
```

#### Output:

## SET 14- Survey Results

### 14A. Stacked Bar Chart

#### Program:

```
install.packages("ggplot2")
install.packages("plotly")
install.packages("knitr")
install.packages("fmsb")
install.packages("reshape2")
survey_data <- data.frame(
  Respondent=c(1,2,3),
  Question1=c("A","B","C"),
  Question2=c("B","A","A"),
  Question3=c("C","D","B"))
survey_long <- melt(
  survey_data,
  id.vars="Respondent",
  variable.name="Question",
  value.name="Response")
ggplot(
  survey_long[survey_long$Question=="Question1",],
  aes(x=Question,fill=Response)
)+
  geom_bar()+
  labs(
    title="Distribution of Answers for Question 1",
    x="Question",
    y="Count",
    fill="Response"
  )+
  theme_minimal()
```

## Output:

## 14B. Radar Chart

### Program:

```
response_data <- data.frame(  
  Question=c("Question1","Question2","Question3"),  
  Score=c(2,3,3))  
  
radar <- data.frame(  
  Max=c(5,5,5),  
  Min=c(0,0,0),  
  Average=response_data$Score)  
colnames(radar)=c("Question1","Question2","Question3")  
radarchart(radar,axistype=1,  
  pcol="blue",  
  pfc="lightblue",plwd=2,  
  title="Overall Survey Response Pattern")
```

## Output:

## 14C. Table

### Program:

```
kable(  
survey_data,  
caption="Survey Response Data"  
)
```

### Output:

Table: Survey Response Data

| Respondent | Question1 | Question2 | Question3 |
|------------|-----------|-----------|-----------|
| 1          | A         | B         | C         |
| 2          | B         | A         | D         |
| 3          | C         | A         | B         |

## 14D. Interactive Dashboard

### Program:

```
htmlwidgets::saveWidget(  
dashboard,  
"SurveyDashboard.html",  
selfcontained=TRUE)  
browseURL("SurveyDashboard.html")
```

### Output:

Show  entries

Search:

Survey Responses
